
Highly motivated aspiring Full-Stack Developer and DOST Scholar with a strong technical aptitude in web and mobile application development. Proven track record of leading cross-functional development teams, winning regional academic competitions, and executing scalable software projects. Adept at leveraging agentic and conversational AI workflows to accelerate the development lifecycle, ensure high-quality code, and drive overall productivity.

EDUCATION

Bachelor of Science in Computer Science

2023-Present

Visayas State University – Baybay City

EXPERIENCE

Technical Lead | Backend Developer Intern

2026

- Served as Backend Developer Intern and Technical Lead for the Alliance Summer Bridge Training Program, tasked with architecting server-side applications using ASP.NET Core MVC.
- Directed a collaborative software project alongside a cohort of interns by designing the end-to-end software development workflow and establishing professional team-based engineering practices.
- Built a Continuous Integration (CI) pipeline to streamline development and performed rigorous quality assurance testing based on custom-designed performance metrics, applying enterprise project management methodologies and Alliance Software Inc.'s Software Development Life Cycle (SDLC).

PROJECTS

Student Organization Election System

2026

- Led the end-to-end development of a student election platform, building all core features to ensure a secure, transparent, and user-friendly voting process.
- Designed a seamless management dashboard that streamlines election setups and improves the overall execution for various student organizations.

AUJ Store Management System

2025

- Built a comprehensive Point of Sale (POS) and inventory tracking web application capable of smoothly processing daily store transactions.
- Created an interactive business dashboard that automatically alerts owners of low stock and displays real-time financial metrics like daily sales and net profit.

VSU Nursing Conduct System

2025

- Developed a reliable campus behavior-tracking system featuring dedicated, secure dashboards for students, faculty, and administrators.
- Automated the reporting workflow with instant email notifications and an organized review system to help faculty efficiently log and manage student infractions.

Hippocrates' Tool

2025

- Created an interactive web application that acts as a symptom checker, allowing users to input respiratory issues and receive instant, data-driven treatment recommendations.
- Programmed a safety-first logic system that carefully cross-references patient allergies and health risks before suggesting any specific medications.

RoboArm Controller

2025

- Designed a mobile app that allows users to wirelessly control a physical 4-axis robotic arm in real-time using an intuitive on-screen joystick interface.
- Successfully published the application on the Uptodown app marketplace, reaching a global audience of electronics hobbyists with over 40 downloads.

GWACalc

2025

- Developed a fast, offline-first mobile app that helps students easily calculate and store their General Weighted Average (GWA) without needing an internet connection.
- Streamlined the student academic experience by replacing manual, complex spreadsheets with a user-friendly interface that instantly updates as new grades are entered.

SKILLS

- **Languages:** C/C++, Python, Java, JavaScript, Dart, SQL, R
- **Software:** RStudio, Jupyter, VS Code, Visual Studio, Supabase, Git, MySQL, Opencode, Gemini
- **Framework:** Next.js, React, Flutter, TailwindCSS, Express

CERTIFICATES

- **Introduction to Data Science**, CISCO Networking Academy
- **Data Literacy**, DataCamp

LEADERSHIP

Computer Science Students' Society President

2025-Present

- Directed the planning and execution of major departmental events, including CS Week and CS Acquaintance Party 2025, while effectively managing and delegating tasks to a large team of student officers.
- Spearheaded internal mentorship initiatives to foster academic growth, peer support, and leadership development among organizational members.

Committee on Education Head

2025

- Organized and coordinated targeted academic study groups to provide supplemental learning support and tutoring for computer science students.
- Acted as a liaison between the student body and faculty to address academic concerns, bridge learning gaps, and advocate for educational resources

CS3 Mentor

2024-Present

- Provided dedicated academic support and one-on-one tutoring to junior students focusing on core subjects, specifically Object-Oriented Programming (OOP) and Fundamentals of Programming (FOP).
- Facilitated hands-on coding sessions and simplified complex programming concepts to help peers improve their problem-solving skills and academic performance.

ACHIEVEMENTS

- **Champion, CS Week Hackathon 2025** – Developed a fully functional C# desktop application under a strict 8-hour time constraint.
- **Champion, CS Week Quiz Bee 2025** – Secured first place in a highly competitive departmental computer science quiz bee against top peers.
- **Finalist, ByteForward Hackathon Competition Visayas Leg 2025** – Competed against top regional universities to engineer a high-impact digital solution tailored for Small and Medium Enterprises (SMEs).
- **Top 5, DICT StartUp Challenge Region VIII (2025)** - Recognized among the top five innovators in a prestigious regional technology startup competition.
- **Top 10, TrendAI UCTF 2025** – Ranked in the top 10 out of 200 competing university teams in a national Capture the Flag cybersecurity competition.
- **College Honors, Visayas State University Honors Convocation (2023-2024)** – Recognized for outstanding academic performance across multiple semesters
- **Passer, DOST Undergraduate Scholarship (2023)** – Awarded a prestigious merit-based government grant for passing a rigorous national qualifying examination.
